

Top 10 Reasons to Consider

An Innovative, Award-Winning, SaaS-based eClinical Platform

Comprehensive

iMedNet delivers everything you need to run a clinical study – in a single system.

Unified

iMedNet is a single solution built by MedNet's own development team – not multiple systems patched together via purchases, mergers and acquisitions.

Do-It-Yourself Control

Sponsors and CROs can build their own studies with ease...without programming.

Rapid Study Development

Studies can be set up quickly...in days or weeks, not months.

Exceptional Flexibility

Ensures your unique workflows, templates and processes are fully accommodated.

Affordable

Our low cost, pay-as-you-go pricing makes *iMedNet* affordable for any research initiative.

Intuitive

iMedNet is exceptionally easy to use and navigate for all study participants.

Efficient

iMedNet delivers documented cost savings of over 50% compared to other eClinical solutions.

Compliant and Secure

iMedNet is fully validated, supports key industry standards (21CFR11, HIPAA, CDISC, etc.) and is hosted in secure, Tier III data centers.

Latest Technologies

iMedNet is a technologically advanced, cloud-based solution...not a pretty wrapper hiding antiquated technologies.

About MedNet

iMedNet is brought to you by MedNet Solutions, a leading healthcare technology company specializing in electronic data solutions designed for the global life sciences community. MedNet's proven, flexible and easy-to-use eClinical systems dramatically improve the efficiency of clinical studies and registries of all types and sizes. Beyond simply electronic data capture (EDC), MedNet's solutions deliver the tools and dashboards required to expertly manage all aspects of clinical research. Since 2001, pharmaceutical, medical device, biotechnology and Contract Research Organizations (CROs) around the world have trusted MedNet to consistently deliver the technology innovation, experience and reliability they need for success.
